December 19, 2013

Dear Exi,

Just a quick note regarding my experiences with Parachutisme Nouvel Air as I understand they have placed a bid for the 2015 World Cup of Canopy Piloting. In August 2013 I attended the Canadian Nationals located at this dropzone as the course technical director for the canopy piloting portion.

The dropzone took the event very seriously and worked very hard to make the nationals run successfully. It's a real team environment. I would say it is one of the more progressive and safety oriented dropzones I've visited during my time in the sport and I've been to over a hundred around the world.

The pond is top notch and has sufficient space for setting up all the courses in accordance with IPC specifications. Due to the layout of the trees, we slightly offset the speed course to allow for a longer runout after the exit gate. The grass is very well manicured and smooth. No ankle breakers in the speed or distance landing areas.

I am fully confident that they have the desire, capacity, and venue to hold a successful IPC category 1 canopy piloting meet.

Kind Regards,

Albert Berchtold
President
Florida Canopy Piloting Association

Flight-1

Martin,

With all due respect, and from my own experiences having competed there during the 2013 CSPA Nationals, I can say with full confidence that the layout of the pond and run out areas for all the courses including the caving speed course, fall well within the guidelines provided by the IPC in the 2013 CP Competition rulebook.

If you have any other question for me or feel as though I can help with this issue any further please don't hesitate to ask me.

Best regards,

Jason Moledzki
